[1. New Technologies for Liver Disease](#)

Release Date: 02-11-2009 Open Date: 03-05-2009 Due Date: 01-08-2012 Close Date: 01-08-2012

Background Liver and biliary diseases affect Americans of all ages and all walks of life. Collectively liver and biliary diseases rank in the top 10 causes of mortality in the United States. Chronic liver diseases affect between 5 and 10 percent of Americans and account for 1 to 2 percent of deaths in the United States. Gallbladder disease affects an estimated 20 million Americans and causes con ...

[2. Radiological/Nuclear Medical Countermeasure Product Development Program](#)

Release Date: 02-09-2009 Open Date: 03-05-2009 Due Date: 01-08-2012 Close Date: 01-08-2012

Purpose The purpose of this funding opportunity is to solicit Small Business Innovation Research (SBIR) grant applications (Phase I [R43] and Phase II [R44, both new and renewal applications]) that are focused on specific Investigational New Drug/Investigational Device Exemption (IND/IDE) enabling product development activities for radiological/nuclear medical countermeasures leading to IND or ...

[3. Probes for Microimaging The Nervous System](#)

Release Date: 12-19-2008 Open Date: 03-05-2009 Due Date: 01-08-2012 Close Date: 01-08-2012

Background An emerging area of scientific opportunity is the design and use of probes to study structure and function at the molecular and subcellular level in living cells. Approaches and tools such as labels that attach to specific peptide or nucleotide moieties, Fluorescent Resonance Energy Transfer, Green Fluorescent Protein (and mutant color variants), and genetically-engineered voltage or ...

[4. Tools for Germplasm Cryopreservation](#)

Release Date: 12-18-2008 Open Date: 03-05-2009 Due Date: 01-08-2012 Close Date: 01-08-2012

Tools for germplasm cryopreservation have become increasingly important in enabling repositories to meet the needs for establishing banks of animal germplasm for current and future research needs. This funding opportunity announcement (FOA) solicits applications from SBCs for Small Business Technology Transfer (STTR) projects that propose innovative research in the areas of animal germplasm cryopr ...

[5. Development of Biomarkers for Mental Health Research and Clinical Use](#)

Release Date: 12-12-2008Open Date: 03-05-2009Due Date: 01-08-2012Close Date: 01-08-2012

Background Biomarkers are objective, measurable biochemical, genetic, or other biological indicators of a physiological or disease process. While some individual biomarkers are useful in biomedicine, complex conditions, such as mental illness, might benefit from constellations of several different biomarkers being used in concert. Whether used alone or in conjunction with others, biomarkers coul ...

8. 1: Scope of the Program:

Release Date: 08-12-2008Open Date: 11-05-2008Due Date: 09-08-2011Close Date: 09-08-2011

The NINDS Translational Research Program is specifically focused on pre-clinical therapy development necessary to begin clinical testing of therapeutic candidates for neurological disorders. This program supports the pre-clinical development of drugs, biologics, and devices including activities from the identification of a therapeutic lead to Investigational New Drug (IND) or Investigational Devic ...

9. 2: Phase I Awards (available only as part of a Fast-Track application):

Release Date: 08-12-2008Open Date: 11-05-2008Due Date: 09-08-2011Close Date:
09-08-2011

The scope of the Phase I portion of a Fast-Track in the program includes all activities in the pre-clinical therapy development pipeline, and the Phase I can be structured in any way necessary to support subsequent pre-clinical development tasks during the Phase II project. However, the Phase II awards in the program support milestone-driven projects that begin with identified candidate therapeuti ...

10. [3: Phase II Awards](#)

Release Date: 08-12-2008Open Date: 11-05-2008Due Date: 09-08-2011Close Date:
09-08-2011

The scope of a Phase II award in the program is the same whether it is based on a previously successful Phase I in the regular SBIR program or if it is part of a Fast-Track application. For entry to the program, projects must have one or more identified therapeutic leads and convincing proof-of-principle on efficacy demonstrated in credible models of the disease or against defined disease targets ...
